Re Item V

Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Reference is made to the following document/s/:

D1: EP-A-1 193 712 (VICTOR COMPANY OF JAPAN) 3 April 2002 (2002-04-03)
D2: US 2002/034130 A1 (KOZUKA MASAYUKI ET AL) 21 March 2002 (2002-03-21)
D3: US 2002/009283 A1 (ICHIOKA HIDETOSHI ET AL) 24 January 2002 (2002-01-24)

2. Document D1 shows a display of thumbnails of stored programs and an overlaid number of the record, see in particular figures 3-6. Document D2 discloses the storage of audio programs, wherein a number of stored or available records is obtained.

Thus, the feature of claims 1 and 10 relating to the display of a number of available programs appears to be obvious from D1 and D2.

The general features of claim 1 relating to the reception and storage of multiple programs are generally known and also shown in D1, cf. paragraph 13.

The subject-matter of independent claims 1 and 10 is therefore considered as being obvious from D1 in combination with D2.

3. Dependent claims 2-9 and 11-18 do not appear to contain any features which, in combination with the features of any claim to which they refer, meet the requirements of the PCT in respect of novelty and/or inventive step, the reasons being as follows:

The features of these dependent claims either appear to relate to several straightforward possibilities from which the skilled person would select, in accordance with circumstances, without the exercise of inventive skill, in order to solve the problem posed, or are only display of information content which does not contribute to solving a technical problem.

4. For the assessment of the present claims 1-18 on the question whether they are industrially applicable, no unified criteria exist in the PCT Contracting States. The patentability can also be dependent upon the formulation of the claims.

**INTERNATIONAL PRELIMINARY
EXAMINATION REPORT - SEPARATE SHEET**

International application No. PCT/US 03/22387

However, since the present claims relate to the technical field of video recording no reason is apparent that the claimed subject-matter should not be industrially applicable.
